Contributing & Community

Welcome!

GhostWire is open to everyone—whether you're a coder, writer, designer, tester, or just curious. Here's how you can help build the future of secure, decentralized communication.

How Anyone Can Contribute

- **Test the app:** Try GhostWire and give feedback.
- **Report bugs:** Found a problem? Open an issue on GitHub.
- **Write docs:** Help make guides clearer for everyone.
- **Design:** Improve the UI/UX or create graphics.
- **Spread the word:** Share GhostWire with your community.
- **Join discussions:** Help shape the roadmap and features.

For Developers

- **Code style:**
  - Rust: Follow rustfmt and clippy guidelines.

- JS/TS: Use Prettier and ESLint.
  - Write clear, well-documented code and comments.
- **Pull Requests:**
  1. Fork the repo and create a feature branch.
  2. Make your changes (with tests if possible).
  3. Run all tests and linters.
  4. Submit a PR with a clear description.
  5. Reference related issues if applicable.
  6. Participate in code review and address feedback.
- **Community Guidelines:**
  - Be respectful and inclusive.
  - Follow the Code of Conduct.
  - Help others and share knowledge.

First Contribution Stories

- *"I started by fixing a typo in the docs—now I help maintain the web UI!"*
- *"I'm not a coder, but I helped organize a mesh event in my town."*
- *"I translated the FAQ so more people could use GhostWire in my country."*
